Fire Chief's Report

March 2018

As March comes to a close, and I await the Operations Report from Chief George, I am aware that March was another month that was very busy for our personnel. Even though I have not seen the total number of runs for the month, I am confident from seeing runs come across my phone, that we saw another month of increases.

As we informed the board last month, our new Administrative Assistant Kelli Brian, began her employment with us last month. Kelli hit the ground running and has been very busy learning all of the different aspects of the many jobs that she will be performing. We have also talked with Kelli about some new tasks that we will have her involved in. After giving Kelli some time to get settled in, we are hoping that Kelli will be able to assist us in doing for forecasting concerning our run load increases. Hopefully we will be able to identify what types of trends that we are seeing in types of runs we respond to, that will also hopefully enable us to project how these increases are impacting our budget. We already know that we will be over budget in EMS supplies because of these increases, but the increases will most likely impact our fuel budget and potentially overtime because of end of shift runs. This information will hopefully assist us in accessing how we can best respond to these trends and increases.

Next week, our department will be hosting a Peer Support training at the park. This class will allow us the opportunity to train additional personnel with the tools that they need to assist our personnel and others throughout the state, when members experience a crisis at work or in their lives. We have two of our chaplains that will be attending this training as well as member from other departments around Marion county who also have peer programs. The cost of the class will be shared by the organizations that send personnel to the course. Our department experienced this type of incident this past weekend, when one of our shift personnel fell from a ladder while painting at home, suffering several very serious injuries. This person will most likely be unable to return to work for several months, and our team is working with other department members to assist the member and his family, meeting the needs that they might have.

Last week, Chris Krahn took delivery of a new pickup truck for Support Services. His truck was the next truck in line to be replaced on our regular rotation schedule. We purchased the

truck from our local Chevrolet dealer, Champion Chevrolet. The park has decided that they would like to have Chris's old truck, so we will transfer possession to them.

Last month, one of our members left our employment to accept a position at the White River Township Fire department. The chief of that department has requested that we sell the turnout gear from that member to them. We have calculated the value of that gear and they have agreed upon the cost, so we will be requesting that you declare it surplus property. This will allow us to sell the gear to them.

Last month Chief Shafer and I attended at Avon Town Council meeting and received approval to utilize a training house on US 36 across from McDonalds. We will be utilizing the house for training for the next several months, and will burn the structure late in the fall. Also on the training front this month, the Fire Department Instructors Conference (FDIC) in Indianapolis will take place the end of the month. Many of our staff will be attending the week long conference participating in hands on and classroom trainings. Again this year, Chief Shafer has secured passes for board members if any of you have an interest in attending.

Over the past couple of weeks, Trustee Hodson and I have been working to push forward the identification of property to be utilized for a training facility. Last week, we met with a town council member to discuss different locations within the town that might be acceptable locations. In addition, we have been talking with a local realtor that represents a property on Kingston Drive. At our meeting next week, Trustee Hodson and I will be updating you and having a discussion about that property. The cost of the property is well above the original amount that we designated for the training ground. I also hope to have some kind of input from CSX about our use of some of their property on Dan Jones.

In closing, I would like to recognize our B shift personnel. On March 26, our crews had a very busy day responding to two different trauma runs. First, the crews responded to a vehicle accident with the vehicle inverted and two trapped patients. Our crews responded to the run, worked as a team to stabilize the vehicle, extricate the patients and transport them to the hospital in a very organized and professional manner. Just after the vehicle accident, our crews responded to a the report of shooting with two patients, and the scene was not secured at the time of dispatch. Upon arrival, crews found one unviable patient and one with a gunshot wound to the head. Again, crews responded to the scene and conducted themselves in a very professional manner and provided lifesaving efforts to the injured patient. Our department medical director Dr. Nossett, responded to both scenes and assisted with treatment and transport. This is just one example of the dedication and commitment of our personnel to be able to respond to two very critical runs in an already busy day. Great work by our B shift personnel!
